

Industry House Water

BSI Member Moses West | Moses West Foundation
Atmospheric Water Generator

The term 'sustainability' means different things depending on who you ask.

In the spirit of self-determination, Black Sustainability categorizes eleven (11) interdisciplinary focus areas as Industry Houses that work together cooperatively. Industry House members host regular House Meetings where issues, opportunities and desired collective outcomes are discussed.

Each meeting crowdsources regional challenges and has an open floor where participants work on & exchange solutions.

Join This House

To identify & solve water challenges in Afrikan/Black communities.

Water is life and is the most crucial need for survival. Drinkable water is a vital resource and this house will explore and exchange best practices to create and maintain sources of clean drinking water for both short- and long-term preparedness.

MEMBERS ARE SKILLED IN...

- Safe Water Access, Sanitation & Hygiene
- Green Infrastructure
- Water Purification & Quality
- Watershed Management
- Water Catchment & Storage
- Water Conservation

FACTS

40%

safe drinking water violations occur in communities of color.
